Forord:

Fra den 5. – 20. december 2012 afholdt DOF Travel atter stortur til den lille indiske delstat Goa. Flytransporten og opholdet på hotel Svelton Manor i Calangute blev tilrettelagt af Apollo Rejser.

Turen var vellykket med mange store fugleoplevelser, hvilket fremgår af rapporten. I begge uger havde vi varmt og solrigt vejr med dagtemperaturer på over 30 gr.C.

Til de daglige ekskursioner benyttede vi os atter af den lokale chauffør og fugleguide Lloyd Ferdnandes, som vi har gode erfaringer med. Udover at transportere os rundt i sin 16 personers bus arrangerede Lloyd morgenmadsbuffet i det fri, hvilket betød, at vi kunne starte tidligt om morgenen ofte før solopgang. Lloyd arrangerede også en bådture på River Zuari med Collared Kingfisher som hovedattraktion.

Hjemmefra havde vi også booket plads for 2 nætter i teltlejren "Backwoods Camp", der ligger i udkanten af naturreservatet Bhagwan Mahaveer Wildlife Sanctuary. Guiden Loven, der udover Leo og Pramod ejer Campen, var atter utrættelig. Han gav os mange gode fugleoplevelser, hvilket han skal have en stor tak for.

Hermed også en stor tak til samtlige deltagere for endnu en uforglemmelig tur med hyggeligt samvær og god stemning, samt en tur der bød på mange store oplevelser, en tak til:

Chr. Ebbe Mortensen, Henrik Marstrand, Jette og Arne Volf, Orla Hugger Jakobsen, Peter Rodemann, Lone Frederiksen, Birthe Baun Andersen, Niels Jørgen Jensen, Stig Kjærgaard Rasmussen samt Lisbeth Strandmark.

En stor tak til Stig for sit store og grundige arbejde med notater samt en tak til Ebbe for fotos til rapporten.

DAGSNOTATER.

Engelske fuglenavne samt artsrækkefølge er som i Helm Field Guides "Birds of the Indian Subcontinent" (Richard Grimmett, Carol Inskipp, Tim Inskipp, 2011). Afvigelser herfra ved split. Engelske navne på diverse dyr er fra internettet m.v.

Ubestemte arter er kun noteret undtagelsesvis (ved særlige arter). Øvrige er udeladt.

Ved registreringer af nogle få særlige arter, som kun er foretaget af en enkelt turdeltager, er dennes initialer anført.

Følgende forkortelser er anvendt:

M = han, F = hun.

ad. = adulte (gamle) fugle, juv. = juvenile (unge) fugle, imm. = ikke udvokset fugl.

1K = fugl født dette kalenderår, 2K = fugl født forrige kalenderår osv.

h angives ved arter, som på turen kun er hørt (dog evt. også set en enkelt gang).

s angives ved særlige arter, som er set - for at understrege dette.

OF = overflyvende fugl(e).

(g) = genganger(e).

t/r = tur/retur.

ARTSNOTATER.

Engelske og latinske fuglenavne samt artsrækkefølge er som i Helm Field Guides "Birds of the Indian Subcontinent" (Richard Grimmett, Carol Inskipp, Tim Inskipp, 2011). Afvigelser herfra ved split er medtaget efter Netfugls "World Bird List" = IOC-listen.

Danske fuglenavne (art og evt. også race) er fra "Danske navne på alverdens FUGLE" (NAVNEGRUPPEN, v. M. Behnke-Pedersen og S. Rønnest, Dansk Ornitologisk forening, 2007). Det bemærkes, at nogle af de nyeste split ikke har fået danske navne.

Engelske og latinske dyrenavne i øvrigt er fra internettet m.v.

Ubestemte arter er kun noteret undtagelsesvis (ved særlige arter). Øvrige er udeladt.

Ved registreringer af nogle få særlige arter kun foretaget af 1 turdeltager er dennes initialer anført.

Følgende forkortelser er anvendt:

M = han, F = hun.

ad. = adulte (gamle) fugle, juv. = juvenile (unge) fugle, imm. = ikke udvokset fugl.

1K = fugl født dette kalenderår, 2K = fugl født forrige kalenderår osv.

h angives ved arter, som på turen kun er hørt (dog evt. også set en enkelt gang).

s angives ved særlige arter, som er set - for at understrege dette.

OF = overflyvende fugl(e).

(g) = genganger(e).

t/r = tur/retur.
