

Goa - India

5.-20. december 2006

BRAHMINY KITE, ADULT

Forord:

Fra den 4. – 19. december 2006 afholdt DOF-Travel sin tredje stortur til den lille indiske delstat Goa. Turen var tilrettelagt i samarbejde med My-Travel grupperejser, der sørgede for fly og hotelophold. Vi boede på Resort Lagoa Azul, der ligger ud til vådområder og marker i Little Baga.

Til de daglige ekskursioner benyttede vi den lokale chauffør og fugleguide Lloyd Fernandes, som vi har gode erfaringer med. Udover at transportere os rundt i sin 16 personers bus arrangerede Lloyd morgenmadsbuffet i det fri, hvilket betød, at vi kunne starte tidligt om morgenen ofte før solopgang.

Hjemmefra havde vi booket plads for 2 nætter i teltlejren "Backwoods Camp", der ligger i udkanten af naturreservatet the Bhagwan Mahaveer Wildlife Sanctuary. Udover opholdet i "Backwoods" arrangerede "Backwoodsdrængene" (Leio, Loven og Pramod) en bådture på River Zuari med Collared Kingfisher som hovedattraktion.

Hermed en tak til samtlige deltagere for en uforglemmelig tur, der bød på mange store (fugle)oplevelser.

Thomas og John.

Den 5. december 2006

Dag 0 – Vi mødtes i Kastrup lufthavn omkring kl. 10.00. Efter en lang tur i køen var vi alle booket ind og på vej til afgangshallen. Flyveturen ud kan altid virke meget lang, hvilket bestemt også var sandt for denne tur. Langt om længe nåede vi Dubai, hvor vi mellemlandede. Sidst på dagen ankom vi til Goa, og lige efter solnedgang forlod vi lufthavnen med bus, og ankom til Lagoa Azul omkring kl. 20. Aftensmaden blev indtaget på Johns støvede favorit restaurant 100 meter fra hotellet. Hanne havde fødselsdag og gav turens første omgang - tillykke med dagen Hanne!

Den 6. december 2006

Dag 1 – Op til 34 grader i skyggen – noget af en forskel fra den ellers lune danske vinter med + 8 grader den dag vi drog af sted. Vi startede dagen omkring hotellet – mængden og variationen af fugle var overvældende. Vi begav os mod Baga Fields, og en gåtur på i alt 12.900 skridt bragte os til sidst til Biera Mar Hotel hvor vi bl.a. nød kolde drikke, Ruddy-breasted Crake og Painted Snipe. Dagen mest usædvanlige obs var vel nok Pacific Swift og Ruddy-breasted Crake. Vi sluttede dagen på den lokale restaurant, hvor Arne fik serveret helstegt tun – og imponerede os ved at tygge sig gennem $\frac{3}{4}$ af kadaveret.

Dag 2 – Atter en varm dag. Det var dog en ganske formildende omstændighed, at vi ikke i dag skulle ud og traske 12.900 skridt. Vi skulle på tur med Lloyd: Birds and Breakfast som han kalder det. Dagen startede med, at John fik sved på panden! Lloyd havde ikke lagt besked på hotellet, og vi håbede, at han ville dukke op kl. 6.00. Kl. 6 præcis stod alle parat, men ingen Lloyd. John trampede rastløs rundt – og efter en halv times trasken, kunne John smile til den velkendte lyd af motoren fra Lloyds gamle bus. Stuvet sammen som burhøns begav vi os mod Carambolim. Det blev en fin dag i området. Vi startede med at besøge markerne ved Carambolim. Det gav mange fine arter. Særligt kan fremhæves to Sorthovedet Muniaer, tre arter af ugler, der alle sås utrolig godt samt en fantastisk smuk juvenil Rovørn, der lod sig beskue på ganske nært hold. Selve lotussøen var smuk som altid: Prydet med smukke hvide lotusblomster og blå Sultanhøns og ikke mindst en fin krokodille. På tilbagevejen besøgte vi Dona Paula, det gav et par specialiteter: Yellow-wattled Lapwing og et stort lærkeshow med Ashy-crowned Sparrow Lark, Lille Sanglærke og Malabar Toplærke som aktører. Vi sluttede atter dagen på den lokale restaurant, hvor Tim fik peberbøf – peberet kom tjeneren med og kværnede ned på bøffen, og voila en bøf forvandlede til en peberbøf – det burde da være til at finde ud af for de fleste.

Dag 3 – Atter en varm dag (det bliver man nok ikke træt af at skrive!). Lloyds Birds and Breakfast ankom kl. 6.15, og kl. 6.30 var vi på vej mod Morjim Beach. Morjim Beach var fortrinligt: Vi blev mødt af en kæmpe flok måger og fandt hurtigt en Stor Sorthovedet Måge mens, en Barred Buttonquail fløj lige forbi hele holdet – og vi havde kun været der i fem minutter! Efter en velfortjent morgenmad, begav vi os ud for at finde Brahminy Starling, hvilket hurtigt lykkedes, på trods af at det ”gamle” sted for arten, var blevet forvandlet til en byggeplads. Herefter gik ture mod Mandrem Beach, som blev droppet på grund af for mange badegæster. Next stop: Et sted hvor man måske kunne se Woolly-necked Stork. Resultatet et styk Grey-headed Lapwing! Frokosten blev spist på en fiskerestaurant helt ned til vandet i Ajuna. En stor buffet med både tun, haj og barracuda gjorde de fleste glade. Her benyttede flere af deltagerne sig af den smukke strand og tog sig en dukkert. Dagen blev afsluttet ved Baga Fields nedenfor Biera Mar. Aftensmaden blev spist på den lokale restaurant, hvor det endelig lykkedes Thomas at give en omgang – to tidligere forsøg var mislykkedes. Og bedst når man tror, at dagen er omme, sidder ved computeren og har skrevet notater samt dagbog, dukker en ny turart op: En Bay-backed Shrike fra Morjim Beach, fotograferet i hast, blot fordi Brahminy Stærerne var fløjet. Aftenens billedredigering afslørede, at den Langhalede Tornskade ikke var en Langhalet Tornskade men den noget sjældnere Bay-backed Shrike. Historien om denne observation er langt længere, men jeg vil her nøjes med at skrive: Tim havde noget, han skulle fortælle Helle!

Dag 4 – Atter en varm dag. Menuen stod på flyvende hunde om morgenen på vej til Mayem Lake. Herefter kørte vi til Tikanem og sluttede dagen ved Saligao Sao. Mayem Lake diskede op med lækkerier i form af Malabar Pied Hornbill, Yellow-crowned Woodpecker og ikke mindst en Drongo Cuckoo, som desværre kun blev set af et par enkelte. Dagens fugl må have været den Blå Glente, som lod sig fotografere i lang tid og i perfekt medlys – det fås ikke bedre!

Dag 5 – En til tider dejlig kølig dag. Vi blev hentet kl 5.30 ved hotellet, og kørt til lejren i Backwoods. I forhold til kysten er temperaturen dalet adskillige grader, og en fleecetrøje blev pludselig nødvendig i de tidlige morgen- og sene aftentimer. I Backwoods blev vi guidet rundt af Premod, som tog os til specialiteter som Spot-bellied Eagle Owl og Sri Lanka Frogmouth. Dagen forløb fint og sluttede ved Tambdi Surla Temple, hvor der blandt andet blev set Brown-backed Needle-tail og Hætteværbling. I lejren blev vi advaret om farlige stole, der kunne styrte sammen uden varsel. Turlledelsen udlovede en øl, til den der først brasede igennem: Intet skal være så skidt, at det ikke også er godt.

Dag 6 – Pyh ha! I dag blev en lummer dag, temperaturen rundede 32 grader og store skyer tårnede sig op hen over dagen. Tidligt om morgenen, eller sent på natten om man vil, kunne der høres hele tre arter af ugler fra diverse telte i campen: Oriental Scops Owl, Brown Hawk Owl og lige ved daggry Jungle Owlet. Efter morgentekl 6.30 kørte vi ud til en skolegård, hvor der var en del blomstrende træer, som gav rigtig pænt med fugle, som kunne ses godt. Formiddagen bød på rovfugleobs hvor petroniaer, en Purple Sunbird ved rede og et par utrolig smukke gamle Høgeørne på tæt hold blev de helt store oplevelser. Efter frokostpause kørte vi til Tambdi Surla Temple – 10 minutter i templet og derefter en utrolig smuk tur ind i junglen og langs floden på udkig efter isfugle og den smukke Indiske Blå Nattergal (Indian Blue Robin). Aftenen sluttede med ginnies og beeries som vores lokale guide så smukt formulerede det. Selskabet brød op, da nogle af selskabets herrer brød ud i sang.

Dag 7 – Bumle rumle rumle bumle, hu hej turen går, ad skæve sving mod Baga. Formiddagen er den sidste i Backwoods. Vi stod op før dag gry og mødtes til te kl 6.30. I går før vi gik i seng blev der afholdt uglestemme-kursus, og langt de fleste hørte denne nat tre uglearter. Dagen i dag skulle atter bruges på at få støvet de to svære isfugle op – og hvad angår Blue-eared Kingfisher så lykkedes det, og alle fik set den rigtig godt. På vej tilbage mod morgenmad, så vi han og hun trogon, noget så smukt: Så absolut en af turens smukkeste fugle. Alt dette skulle overgås: Tim sad i Campen og så tre fede overflyvende Great Hornbills, Kirsten, Hanne og Carl Erik sad og hyggede sig med dem i en bugnende frugttræ. Steen så én komme lige over hovedet brusende som en Knopsvane. Arne og Lis så en kæmpe næsehornsflugt flyve over stien, og Thomas, som var i fuld sving med at fortælle et eller andet, så den dårligt mellem træerne. Værst var det for de øvrige, for de så dem slet ikke. Carl Erik har billeder – den er god nok!

Dag 9 – En fantastisk tur til Bondla hvor alle fik en chance til at få kigget på mange af de skovfugle, der voldte os så meget besvær i Backwoods. I Bondla gik det bare meget lettere. Lloyd havde sørget for Picnic-lunch, det var helt i top. Vi sluttede dagen ved Carambolim, hvor vi bl.a. så 3 Citronvipstjerter. Vores ene leder, Thomas, måtte desværre blive hjemme grundet et maveonde.

Dag 10 – Tidligt op og af sted til rovfugleparadiset Velim Lake. Lloyd var præcis som altid, og kun med en mindre forsinkelse kunne bussen begive sig på den næsten to timer lange køretur mod syd. Første stop var ved sydsiden af søen, her blev der kigget ænder, fotograferet, spist morgenmad og ikke mindst nydt en flot steppehøg han, der kom lige ind over. Udover fugle var der underholdning af lokal karakter: en ”snapse” dyrker kravlede fra palme til palme, og kvinder i farvestrålende klæder bar store kurve på deres hoveder. Efter at have kigget på ænder med mere, kørte vi ud i et mere åbent område, hvor vi brugte de efterfølgende timer til at obse rovfugle. 16 arter blev det til, men desværre glimrede gribbene ved deres fravær – er det slut med gribbe i Goa? På turen hjem, var vi blevet inviteret hjem til Lloyd, hans kone og børn diskede op med lokale specialiteter, og ikke mindst palmesnapsen tiltrak sig opmærksomhed – et hyggeligt møde med Lloyd’s søde familie.

16. december 2006

Dag 11 – En kølig, stille og behagelig morgen. Den helt rette morgen til en sejltur op ad Zuari River – heldigt, for det var nemlig, hvad programmet stod på. Og heldet ville ingen ende tage: Vi var næppe ude af havnen i Dona Poula, før Steen havde opdaget et par pukkeldelfiner. ”Luck you!”, sagde bådføreren, det var nemlig lang tid siden, at han havde set delfiner inde i floden. Siden blev det til fine terner dystende i pælesidning, smukke Mangroveisfugle (Collared Kingfisher), en flot spankulerende Terekklire bestilt og opdaget af Svend – og som rosinen i pølseenden en adult Red-necked Falcon lige hen over hovedet. Sikken en dag. Resten af dagen stod på sol, strand og Biera Mar Fields.

Dag 12 – En smuk klar og kølig morgen. Vi startede dagen ved Carambolim Lake, hvor vi først kiggede småfugle i krattene bag søen, og der var rigtig fint med fugle. Blandt arter kan nævnes en flok Pompadour Green Pigeons og en Black-naped Oriole han. Ved søen indtog vi vores morgenmad og kiggede ænder. Den sidste del af formiddagen tilbragte vi på Carambolim Fields. Her blev kigget rovfugle, vadere – især en meget smuk Terekklire bragte glæde. Efter frokost kørte vi først til Santa Cruz for at kigge vadefugle og til sidst til Dona Paula for at give værlingerne en sidste chance.

Dag 13 – En kølig smuk morgen. Holdet havde delt sig i tre: John tog Lisbeth, Leon, Helle og Kaj med i Baga Hills, Thomas tog Tim, Svend, Lis og Carl Erik med til Morjim Beach og resten blev i Baga området og turistede. Aftenen sluttede på restaurant All Spice, hvor DOF Travel betalte en fin afslutningsmiddag: tre retter, drinks og kaffe med likør – jo der blev skam sluttet af med maner. Der blev holdt et par korte taler af turledelsen, hvorefter Carl Erik Mabeck tog ordet – roste de øvrige deltagere til skyerne og bebrejdede turledelsen, at de ikke havde planlagt turen godt nok. Eksempelvis skulle man på hver enkelt lokalitet bladde fra ende til anden blandt de 150 plancher i fuglebogen for at finde fuglene. God planlægning ville have været, hvis man den første dag så fuglene på planche 1- 10, den efterfølgende dag fugle på planche 20-30 og så fremdeles Jo han er en skarp herre ham C.E. Mabeck.

Dag 14 – Turens sidste dag, og så kun en halv af slagsen. Vi startede ved solopgang, gik en tur omkring hotellet, og derefter ind omkring spøgelseshotellet hvor en vagt tog os med op i en af de to halvfærdige kupler, hvor vi så store imponerende vægmalerier. Kuplen fungerede også fortrinligt til fugletårn – udsigten var modsat hotel Biera Mar. Turen gav godt: Et par Green Warbler samt en fotogen Plum-headed Parakeet var blot nogle af de fugle vi stødte på denne sidste morgen.
